Investment Objective and Strategy

Fund Objective and Manager:

The Fund is designed for investors seeking a broadly diversified exposure to non-North American equities (Europe, Australia, and the Far East) with investment decisions based on value investing.

The Fund is managed by Sprucegrove Investment Management Ltd. of Toronto. Prior to founding Sprucegrove Investment Management in September 1993, the Sprucegrove Investment Management team managed the Confederation Life International Pooled Fund since its inception in 1985.

Investment Style:

The strategy of the Fund employs a "value approach" to the management of equities. It emphasizes the long term and it focuses on the selection of individual common stocks. Since the global market is vast, over the years we have developed a working list of quality companies from which the investment selections are made. The characteristics of this working list include: a record of high and consistent profitability, market leadership and/or competitive advantage, financial strength, an opportunity to grow the business and capable management. In order for the stock to move from the working list to the portfolio, the value must be very attractive.

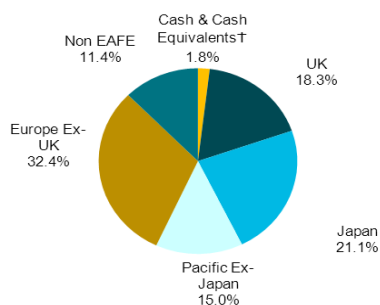

In our view, buying stocks when they are selling at a discount to their intrinsic value is the only way to invest. It provides a margin of safety, since if the stock is already cheap at the time of purchase.
