Management Discussion of Fund Performance

Investment Objective and Strategies

To provide superior long-term investment returns by investing in equity securities trading on the major markets around the world. The Fund will focus on holdings in the EAFE (Europe, Australasia & Far East) markets but may also have some exposure to North American and Emerging Markets. The Fund primarily invests in a broad range of international companies and is not restricted by capitalization or industry sector, although portfolio diversification is a consideration in the selection of securities for the Fund. Under normal circumstances, the Fund will keep its portfolio fully invested, to the greatest extent possible, in equity and equity related securities.

Our strategy employs a value approach to the management of equities. It emphasizes long-term investment and it focuses on the selection of individual securities using a bottom-up, research driven approach. Sector exposure is a residual of this stock selection process. Fund holdings must meet our standards of investment quality, including a history of above average financial performance, a secure financial position, reputable management and a growth opportunity in terms of sales, earnings, and share price.

Risk

The overall risks of investing in the Fund are as described in the Simplified Prospectus. There were no material changes to the Fund during the year that affected the overall level of risk.

Results of Operations

The Fund's net assets decreased by 18.4% in the first half of 2022 to \$37.3 million from \$45.7 million at the end of 2021. Of this change, \$6.4 million was attributable to negative investment performance and \$2 million to net outflows from unitholders.

For the six months ended June 30, 2022, Series A of the International Equity Plus Fund returned -14.4% before fees and expenses compared to the MSCI EAFE Index, which returned -18.1%. After fees and expenses, Series B and F returned -15.1% and -14.8% respectively. (All performance figures are shown in Canadian Dollars).

The International Equity Plus Fund is designed for investors seeking a broadly diversified exposure to non-North American equities. As of June 30, 2022, the United Kingdom, France, Japan, Germany and Switzerland accounted for 79.5% of the portfolio's geographic exposure.

In the first quarter of 2022, the International Equity Plus portfolio returned -5.3%, outperforming the MSCI EAFE Index, which returned -6.9%. The first quarter of 2022 was one of two halves. Early on, markets declined, and lower-valued stocks benefited thanks to growing expectations of monetary tightening as central banks began to react to more persistent inflation and labour market tightness. As the quarter progressed, geopolitical uncertainty reigned as Russia invaded Ukraine and expectations for monetary tightening declined. In March, higher-valued, growth-oriented stocks outperformed more valuation-based names as investors reduced exposure to cyclicality.

The International Equity Plus fund outperformed the MSCI EAFE Index in the second quarter of 2022, returning -9.6% compared to -12.0%. The outperformance was due to positive contribution from Telecoms and Financials which benefited from higher inflation and increasing interest rates, respectively. Healthcare companies also performed well as investors sought the defensiveness of their cash flows. On the negative side, Consumer Staples underperformed over inflationary pressures and a deteriorating economic backdrop. The portfolio's exposure to Utilities was also a detractor on fears over European energy supply due to the ongoing Ukraine crisis.

Our process and philosophy allows us to look at a company's longer-term prospects and value the business on this basis. While indiscriminate market selling can be uncomfortable, it has historically led to some of the most rewarding opportunities for long-term investors. As such, we are being patient and will use the waves of monetary tightening, economic weakness, and earnings pressure which result in more favourable valuations to purchase new positions. Our focus continues to be on companies with a strong financial position and structural tailwinds supporting long-term returns.

Recent Developments

In July 2022, the MSCI EAFE (C\$) returned +4.4% for the month.

Related Party Transactions

Leith Wheeler Investment Counsel Ltd. (the “Manager”) is the manager and portfolio advisor of the Fund and is responsible for the Fund’s day-to-day operations. The Fund pays the Manager a management fee as compensation for managing the investment portfolio of the Fund.

As at June 30, 2022, the Leith Wheeler Balanced Fund owned 3,249,344 Series A units of the Fund, a fund under common management. This holding represents approximately 78.0% of this Fund.

Management Fees

The Manager provides the Fund with investment management services, including fund accounting and unitholder record keeping. In return, the Manager receives a management fee based on the net assets of the Fund, calculated on a daily basis. The annualized management fee for the Series B and Series F units of the Fund are 1.50% and 0.95%, respectively. During the year, the Fund paid the Manager \$28,416 for Series B and \$485 for Series F (exclusive of GST/HST) of its net assets as management fees. The Fund does not reimburse the Manager for operating costs incurred in administering the Fund. The Manager paid all operating expenses except brokerage commissions, transaction charges and taxes. In respect of Series A units, the unitholder pays the Manager a negotiated management fee outside the Fund.

We do not directly or indirectly pay fees, sales commissions or trailing commissions, nor do we provide any non-monetary benefits to registered dealers for distributions of units of the Fund. If a broker charges you a commission or fee, that is a matter between you and the dealer.

- (1) This information is provided as at December 31 of the year shown; unless noted otherwise.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

General

The Fund’s performance assumes all distributions made by the Fund in the years shown were reinvested in units of the Fund and is based on net asset value per unit. If you hold the Fund outside a Registered Plan, you will be taxed on these distributions.

The performance information does not take into account sales charges, other charges or taxes that, if applicable, would have reduced returns or performance; but includes management fees and other expenses borne directly by the Fund. Past performance does not necessarily indicate how the Fund may perform in the future.

Year-by-Year Returns

The following bar chart shows the Fund’s historical return, which changes each year and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each year.

* Series F units were created on May 25, 2016. Return from May 25, 2016 to December 31, 2016, not annualized.
