Quiet Money®

This interim management report of fund performance contains financial highlights, but does not contain either interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1-888-292-1122, by writing to us at 1500 – 400 Burrard Street, Vancouver, BC V6C 3A6 or by visiting our website at www.leithwheeler.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

To provide superior long-term investment returns by investing primarily in a diversified portfolio of common shares and other equity related securities of Canadian issuers. The Fund is not restricted by capitalization or industry sector although portfolio diversification is a consideration in the selection of securities for the Fund. Under normal circumstances, the Fund will keep its portfolio fully invested, to the greatest extent possible, in Canadian equity and equity related securities.

Our approach to stock picking is based on fundamental research with a strong “value” bias. Our test for value is viewing any investment we make as if we were “buying the whole business”. Therefore, the critical question becomes “what would be the price of the whole business that would make the purchase a profitable one?” Our experience has been that the price of a company in the stock market does not always reflect its real value. This discrepancy between price and value creates excellent investment opportunities.

As value investors, we tend to include companies in the portfolio when they are “out of favour” by the market and have declined in price. Companies can become undervalued when there is a lack of investor awareness; when an entire industry is out of favour with investors; or when a company experiences a short-term difficulty which, following careful analysis, we believe can be overcome. By purchasing these companies after a price decline, we find we are able to control risk in the portfolio as these investments often have less downside risk while offering a decent potential return.

Risk

The overall risks of investing in the Fund are as described in the Simplified Prospectus. There were no material changes to the Fund during the year that affected the overall level of risk.

Results of Operations

The Fund’s net assets increased by 6.1% in the first half of 2023 to \$3,936.5 million from \$3,710 million at the end of 2022. Of this change, \$278.4 million was attributable to positive investment performance and \$51.9 million to net outflows from unitholders.

For the six months ended June 30, 2023, the Canadian Equity Fund Series A increased 7.5% before fees, and Series B increased 6.8% after fees and expenses. The S&P/TSX Composite Index (TSX) increased 5.7% over the same period.

In the first quarter, the Fund outperformed the TSX due to an overweight in Information Technology and stock section in Consumer Discretionary and Utilities sectors. Outperformance was partially offset by stock selection in Energy and not owning Shopify (+37.8%). The recent banking turmoil in the US and Europe dominated capital markets in the latter half of the quarter. Concerns of systemic risk in the financial system were raised following the failure of two US regional banks and subsequent near collapse of Credit Suisse. The Canadian banks in the Fund are, in our view, in good shape, with strong liquidity and a diversified deposit base. During the quarter, most banks in the Fund generated positive returns (CIBC +6.2%, Scotia Bank +4.2% and Royal Bank +2.5%).

The Fund rose over the second quarter and outperformed the TSX. Relative performance was helped by strength in Materials and Energy holdings, as well as an underweight position in these sectors. In addition, holdings in Industrials contributed to relative outperformance, partially offset by holdings in Information Technology and Consumer Staples. As we reach the midpoint of 2023, financial markets are keeping an eye on significant economic developments. The overall macroeconomic situation indicates a resilient economy despite ongoing concerns of a recession. However, inflation remains persistent, presenting a challenge for central bankers.

Recent Developments

In July, the S&P/TSX Composite Index rose +2.6%.

Related Party Transactions

Leith Wheeler Investment Counsel Ltd. (the “Manager”) is the manager and portfolio advisor of the Fund and is responsible for the Fund’s day-to-day operations. The Fund pays the Manager a management fee as compensation for managing the investment portfolio of the Fund.

Management Fees

The Manager provides the Fund with investment management services, including fund accounting and unitholder record keeping. In return, the Manager receives a management fee based on the net assets of the Fund, calculated on a daily basis. The annualized management fee for the Series B units of the Fund is 1.40%. During the year, the Fund paid the Manager \$200,646 (exclusive of GST/HST) of its net assets as management fees. The Fund does not reimburse the Manager for operating costs incurred in administering the Fund. The Manager paid all operating expenses except brokerage commissions, transaction charges and taxes. In respect of Series A units, the unitholder pays the Manager a negotiated management fee outside the Fund.

We do not, directly or indirectly, pay fees, sales commissions or trailing commissions, nor do we provide any non-monetary benefits to registered dealers for distributions of units of the Fund. If a broker charges you a commission or fee, that is a matter between you and the dealer.

(1) This information is provided as at December 31 of the year shown; unless noted otherwise.

(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

General

The Fund’s performance assumes all distributions made by the Fund in the years shown were reinvested in units of the Fund and is based on net asset value per unit. If you hold the Fund outside a Registered Plan, you will be taxed on these distributions.

The performance information does not take into account sales charges, other charges or taxes that, if applicable, would have reduced returns or performance; but includes management fees and other expenses borne directly by the Fund. Past performance does not necessarily indicate how the Fund may perform in the future.

Year-by-Year Returns

The following bar chart shows the Fund’s historical return, which changes each year and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each year.
