FUND OBJECTIVE

The Fund seeks to provide above-average long-term investment returns by primarily investing in equity and equity-related securities issued by companies in international markets, including developed, emerging and frontier markets generally outside of North America. We will not change the fundamental investment objectives of the Fund without the consent of unitholders (either by written consent of holders of at least 50% of the outstanding units, or by majority vote at a meeting of unitholders).

INVESTMENT STYLE

We utilize a value approach to stock selection, applying bottom-up, fundamental analysis to all investment decisions. Our investment goal is to protect client capital while generating superior investment growth, regardless of economic conditions. We seek to invest in solid companies with stable earnings, a long-term business model, and a capable management team we can trust that can navigate variable market conditions.

As value investors, we tend to include companies in the portfolio when they are viewed as "out of favour" by the market and have declined in price. Companies can become undervalued when there is a lack of investor awareness, when an entire industry is out of favour with investors, or when a company experiences a short-term difficulty which, following careful analysis, we believe can be overcome. By purchasing these companies after a price decline, we are able to control downside risk in the portfolio while adding the potential for an attractive return.

Performance returns for the Leith Wheeler Funds and benchmarks are calculated by Leith Wheeler Investment Counsel Ltd. The indicated rates of return (other than for each money market fund) are the historical annual compounded total returns for the period indicated including changes in unit value and reinvestment of all distributions. Benchmarks published in US\$ are converted using the applicable Bloomberg exchange rate. Distribution history should not be used to predict future distributions. The indicated rates of return for each money market fund are annualized historical yields based on the seven-day period ended as indicated and annualized in the case of effective yield by compounding the seven day return and does not represent an actual one year return. Fund values change frequently. The Funds are not guaranteed or covered by the Canadian Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that a money market fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment will be returned to you. Past performance may not be repeated.

Portfolio weightings are based on percentage of total market value, not percentage of total Net Asset Value (NAV) and may differ from the fund's regulatory documents. This document has been compiled by LWIC from sources believed to be reliable, but no representations or warranty, expressed or implied, are made by LWIC as to its accuracy, completeness or correctness. Due to rounding, numbers presented may not add precisely to the totals provided and percentages may not reflect the absolute figures.
